

TechNova Solutions Pvt. Ltd.

Work From Home (WFH) Policy

This policy outlines the eligibility, expectations, security requirements, productivity standards, and responsibilities for employees working remotely under TechNova's hybrid work model. It complements the Employee Handbook and IT Security Policy.

1. Purpose

The Work From Home Policy enables flexibility while maintaining productivity, collaboration, and information security. Employees are expected to meet the same professional standards regardless of work location.

2. Eligibility

Full-time employees who have successfully completed probation are eligible for the hybrid work model. New hires may receive temporary exceptions with approval from HR and their reporting manager. Certain client-facing or hardware-dependent roles may require additional office attendance.

3. Hybrid Work Schedule

Employees are expected to work from the office at least three days per week unless approved otherwise. Core collaboration hours are 10:00 AM to 4:00 PM. Team leads may designate common office days to improve collaboration.

4. Attendance & Availability

Employees must log into the HR attendance portal before 9:30 AM on remote workdays. During working hours they should remain available through Microsoft Teams, company email, and scheduled video meetings. Calendar status should accurately reflect availability.

5. Home Workspace Requirements

A quiet workspace, reliable broadband connection (minimum 50 Mbps recommended), webcam, microphone, and company-issued laptop are required. Employees are responsible for maintaining a safe and distraction-free work environment.

6. Security Requirements

Company work must only be performed on company-issued devices. VPN usage is mandatory for accessing internal systems. Multi-factor authentication must remain enabled. Confidential information should never be stored on personal devices or shared through personal email accounts.

7. Performance Expectations

Remote work does not change performance expectations. Employees are responsible for meeting deadlines, attending meetings on time, responding to work messages during office hours, and updating task progress in project management tools.

8. Expense & Equipment

TechNova provides laptops, monitors (where approved), keyboards, and other essential equipment. Internet reimbursement of up to ■1,000 per month is available for eligible employees. Any damaged equipment must be reported to IT within one business day.

9. Exceptions & Emergency Situations

In the event of internet outages, power failures, or emergencies, employees should immediately notify their reporting manager. They may be asked to work from the nearest office location if business continuity requires it.

10. Policy Compliance

Repeated misuse of work-from-home privileges, unapproved absence during office hours, or violations of security requirements may result in disciplinary action or temporary suspension of remote work privileges. HR reviews policy compliance periodically.
